Dear Ms. Dortch:

ITIF writes to support the Commission's efforts to make spectrum above 24 GHz available on a flexible use basis as a key step in enabling next-generation wireless services. The Commission deserves congratulations for moving forward with this important work with haste.

We respectfully submit for the record the attached report, entitled "5G and Next Generation Wireless: Implications for Policy and Competition," which highlights the importance of making these bands available for 5G systems.

Sincerely,
